Overview

BETA Healthcare Group (BETA) is the largest professional liability insurer of hospitals on the West Coast and provides liability and workers' compensation coverages to protect hospitals, medical groups, clinics, hospices, physicians, and other healthcare workers. As a risk management joint powers authority (JPA) governed by its member healthcare organizations, BETA is a mission-driven organization with people pledged to maximizing our members' ability to provide care while reducing harm to patients and protecting employees.

Comprehensive Products and Services

We offer flexible, tailored solutions for members' unique insurance needs from first-dollar comprehensive coverage ranging from professional liability to workers' compensation, excess coverage (for those who decide to self-insure), and alternative risk and insurance solutions.

COVERAGES

Healthcare Entity Comprehensive Liability

Excess Healthcare Entity Comprehensive Liability

Medical Group Professional Liability

Workers' Compensation

Excess Workers' Compensation

Directors, Officers and Trustees Liability

Employment Practices Liability

Auto Liability and Physical Damage

SERVICES

BETA provides a host of creative, innovative and leading-edge risk consulting services that help our members instill best practices and operationalize strategies to strengthen systems at a foundational level. We also partner with hospitals, health plans and healthcare organizations that are not part of our insurance program in consulting engagements to advance patient and employee safety and implement effective communication and resolution (CRP) programs.

Our people bring a wealth of experience to the fore and are attuned to emerging risk and claims trends. We take a team approach to claims management and deliver on our 47-year history of service excellence while reducing costs and improving claims outcomes.

Partnering to Protect Patients and Employees

Our industry-leading risk programs go beyond what you can expect from other carriers in the market. We are committed to helping our members deliver the best patient care and establish safe workplace environments, which in turn drives down claims and reduces overall cost.

BETA members can participate in a host of educational opportunities and programs that help them mitigate risk and make their facilities safer — and certain initiatives provide incentive premium credits.

Claims Management Philosophy

At BETA Healthcare Group, we seek to achieve the ethical and efficient resolution of claims through early intervention, quality investigation, collaboration, and proactive litigation management. Our claims professionals are a collaborative, service-driven team that take a hands-on approach to healthcare claims management, leading to timely claims handling and reduced costs, contributing to one of the best claims performance records in the industry.
